More Set Operations

Difference, symmetric difference and complement

- **Difference.**

$$A - B = \{x : x \in A \text{ and } x \notin B\}$$

Difference, symmetric difference and complement

- **Difference.**

$$A - B = \{x : x \in A \text{ and } x \notin B\}$$

- **Symmetric difference.**

$$A \oplus B = \{x : x \text{ is in } A \text{ or } B \text{ but NOT both}\}$$

Difference, symmetric difference and complement

- **Difference.**

$$A - B = \{x : x \in A \text{ and } x \notin B\}$$

- **Symmetric difference.**

$$A \oplus B = \{x : x \text{ is in } A \text{ or } B \text{ but NOT both}\}$$

- **Complement.**

$$\bar{A} = \{x : x \notin A\}$$

Examples

Draw the Venn diagrams for:

1. $A - (B \cap C)$
2. $(B - A) \oplus C$
